

DANIEL OLUWAFIKAYO ADEDIRAN

Technical Support Specialist | Junior Frontend Developer
Lagos, Nigeria • 08116016791 • doa.adediran@gmail.com • [GitHub](#)

PROFESSIONAL SUMMARY

Detail-oriented technical professional with a strong foundation in software development and a proven ability to diagnose and resolve technical issues efficiently. Experienced in building and maintaining web applications, integrating REST APIs, and managing complex application states — all skills that translate directly into effective technical support. Adept at communicating technical concepts clearly to both technical and non-technical audiences. Eager to leverage development expertise and analytical thinking to deliver exceptional user support and drive issue resolution.

TECHNICAL SKILLS

Support Tools	Browser DevTools, REST API debugging, JSON data inspection, Git version control
Programming	JavaScript (ES6+), HTML5, CSS3
Frameworks	React.js, Redux Toolkit, Context API, Tailwind CSS, CSS Modules
APIs & Data	REST APIs, JSON, API endpoint testing & integration
Version Control	Git, GitHub — issue tracking, PR reviews, collaborative workflows
Deployment	Vercel — deployment, monitoring, and rollback
Package Mgmt	NPM — dependency management and troubleshooting

CORE COMPETENCIES

Technical Troubleshooting	User Communication	API & Integration Support
Fast Learning & Adaptability	Attention to Detail	Team Collaboration

RELEVANT PROJECTS & APPLIED EXPERIENCE

E-Commerce Product Dashboard

- Built a responsive admin dashboard for managing product data — closely mirroring real-world support ticket and CRM interfaces used in tech support environments.
- Implemented dynamic search and filtering to help users quickly locate records, a key workflow in support queue management.
- Debugged API failures and handled error states gracefully, reinforcing skills directly applicable to troubleshooting data integration issues.

Stack: React.js, Redux Toolkit, Tailwind CSS, REST APIs

Weather App — Real-Time API Integration

- Integrated a third-party REST API and handled edge cases such as invalid city inputs, network failures, and unexpected data formats — practical troubleshooting experience.
- Designed clear UI feedback for error states and loading conditions, mirroring how support tools must communicate system status to end users.
- Implemented React hooks for state management, demonstrating ability to trace and debug application logic.

Stack: React.js, Tailwind CSS, REST APIs, React Hooks

Personal Portfolio Website

- Designed and deployed a fully responsive portfolio site, demonstrating end-to-end ownership from development to production deployment on Vercel.

- Applied structured component architecture and consistent UI patterns — transferable to maintaining internal support tools and documentation portals.

Stack: React.js, Tailwind CSS, Vercel

EDUCATION & CONTINUOUS LEARNING

Larva Tech Academy | Software Development & Web Technologies

- Proficient in modern JavaScript frameworks, REST API design, and frontend deployment through hands-on project development.
- Continuously expanding knowledge in networking fundamentals, IT systems, and customer service best practices relevant to technical support roles.
- Actively maintains public GitHub repositories demonstrating version-controlled, collaborative development workflows.
